Don't compromise
network performance
or
security

Businesses demand more from their networks than ever before. Yet too many solutions compromise network performance for security. It's a difficult balancing act.

How can companies achieve performance and security without sacrifice?

Network security challenges

43%

of all cyber-attacks target small and medium businesses.[1] Resource-constrained businesses are often easier targets due to outdated firewalls or less sophisticated cyber-defenses that haven't scaled with business growth.

Network performance challenges

84%

of employees say networking infrastructure is essential for seamless remote work.[2] But maintaining network performance is a challenge with expanding traffic, locations, devices, and apps, as well as slow cybersecurity solutions.

The answer: Cloud-managed Secure Networking with Cisco Meraki

Protect your business from attacks without slowing down your network. With Cisco Meraki MX, you can achieve an integrated networking and security solution. Deliver superior security, outstanding network performance, and intuitive operations at your price point with Cisco and

<Partner Name>

Superior malware protection

98%

Cisco Meraki MX blocks 98% of malware threats? (informed by 560 million security events every day.) That's 2% better than the industry average, and 2x more effective than many standalone solutions.

Zero-touch deployment

30%

Meraki MX is truly zero-touch, resulting in 30% faster firewall deployment, along with site-to-site VPN in only three clicks and advanced firewall rules in a few clicks as well.

Fastest threat protection

<10 mins

Cisco provides the fastest protection against the latest threats. Talos, the largest commercial threat intelligence team, provides automatic protection against new malware in less than 10 minutes.

Best network visibility

27%

Meraki offers the best network visibility to scale with business needs. It recognizes 27% more applications than leading competitors,[4] a key advantage to control and block malicious applications.

Proven cloud leader

+8.9M

With more than 588,700+ customers, 8.9+ million active Meraki devices and 3.1 million active secure networks around the world, Cisco Meraki is an industry pacesetter in IT.

Award-winning on-prem option

Need an on-premises solution? Elevate your security performance and ease of use with Cisco Firepower 1010. CRN Labs' 2023 winner for best next-generation firewall.

Upgrade your network security with Cisco Meraki

Don't settle for standalone, inflexible products that can't scale.
Deliver the highest cybersecurity protection that also optimizes connectivity and scales without complexity with
